Stone Surfaces

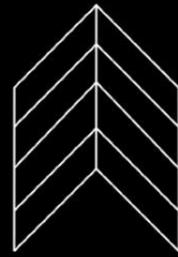

.

.

The Tempesta Stone division is proud to announce the launch of a stunning new collection: Marmo Surfaces. This line is composed of timeless imported marble and other stones featuring an enchanting surface texture that looks different from every angle, as the light falls across the texture.

Featuring 3 geometric formats in a curated set of colours, this high-end decorative product is the perfect blend of function and form. When used as a highlighter paired with its parent stone, it looks spectacular, but when used on all four walls is when it looks truly breathtaking.

Marble has adorned homes, commercial spaces and architectural structures for ages - as a mainstay of Greco-Roman architecture, as the foundation of the beautiful Taj Mahal and as the material that discerning homeowners aspire to use - its popularity has only grown with time. The idea for this unique collection was born out of our perennial appreciation for natural stone and the vision to create something never seen before. This vision was made a reality with the help of decades of experience in the stone processing industry, married with cutting-edge technology.

The foundation of this collection boasts of marble from Italy, France and Turkey. Featured here are the exquisite pencil veins of Venatino, the characteristic voids of Travertino and the sumptuous gold-on-black combination of the bolder St. Laurent, finished with a magnificent surface texture to result in a product that exudes luxury. Bring a touch of the exotic into your home.

FLUTES

An elegant fluted texture is machined to perfection on the surface of a choice selection of marble & stone colours.

This minimalist design concept looks immaculate whether arranged vertically or horizontally, and will appear different relative to how light falls across it, serving to bamboozle the viewer.

DIAMOND

The potential of these precisely cut diamond shapes is truly unlocked when they are seamlessly assembled into a tessellating hexagon pattern.

This geometric delight is further elevated by the contours on the surface which converge from different directions to create an extraordinary effect.

CHEVRON

The classic chevron pattern has been a mainstay of design for decades, and it's easy to see why.

The grooves on this surface are artfully designed such that this product's beauty is significantly enhanced with the right illumination.

DIAMOND

CHEVRON

Dimensions 30×60×1.5 cm

Area: 2 sq.ft.

Dimensions 11.5×20×1.5 cm

Area: 0.125 sq.ft.

This is the size of 1 diamond tile;
when you put 3 of these together,
you get a hex like in the figure.

Dimensions 20×60×1.5 cm

Area: 1.3 sq.ft.

This is the size of 1 tile;
when you put 2 of these tiles
together, you get a chevron
like in the figure.

*This collection is suitable for internal and external use, including wet areas.
Lighting can significantly enhance the beauty of this product. The ideal result is achieved when the light falls
across the surface of the tile.*
