## Adamas

ADAMAS is a new, multi-faceted interpretation of the classic. With the unsurpassable power of bright colours and reflections bouncing across the surfaces, these bevelled-edge tiles have timeless style.

## Calx

A simple, captivating collection of tiles that display a classic influence combining vintage style with the minimalism of today's designs.

## Flows

Flows is a collection of flooring with soft and nuanced aesthetics that is characterized by a range of colours and organized in two chromatic moods: Artic Flow and Tropical Flow.

## Artic FLOW

## Tropical FLOW

Artic Flow and Tropical Flow express different and complementary worlds of colour. With this significantly large range of colours it is easy to find the ideal shade to highlight the character of any internal and external environment.

## PIETRA

The Pietra range of ceramic tiles embody technical perfection combined with beauty and the quality of materials enhanced by technology. These characteristics are at the disposal of all sector professionals, to satisfy even the most innovative, sophisticated demands.

## ORNAMENTA

With a focus on detail, striving to create something new and unique, playing with different surfaces, colours and textures to produce materials created to liven up spaces and renew everyday living, ornamental motifs on tiles add motion to create a variety of visuals.

## Majolica

Inspired by tradition, these top quality tiles offer original compositions with all the variability and the natural look of the materials that inspire them, using the most advanced technologies to reproduce their veins, relief and surface features. Technological research enriches the collections with precious textures to liven up the surfaces of the tiles and create spaces full of life to suit the most sophisticated sensibilities.

## HEX/CUBE

Harmonious contrasts of these tiles fill the room with light and radiance. The matt finish represents a simple, essential design solution. A blend of graphic lines create tiles that suit any design requirements. The texture & the neutral shades in a contrast create a clean, refined look.

## NORDIK STONES

True style lies in the quality of detail. Nordik Stones is flooring of essential design impeccable in every respect: from the colours to the high definition texture of the material and the surface finishes.

## piasentina

Endless pleasure is to be found in the modern elegance of this material whose countless application possibilities make it ideal for use in major architectural developments and in contained spaces of sheer unadulterated intimacy.

## NORDIK STONES

Nordik Stones is a highly sought after material full of character which adds warmth and a very personal touch to all environments. The elegant chromatics, which vary from piece to piece, make for a natural and non-repetitive look. The warmth and sense of well-being that an environment can make us feel is due to the harmony of the colours and materials: Nordik Stone floors offer the pleasing facility of natural textures, with warm and bright nuances.
